

## **REMARKS**

In the Final Office Action of June 5, 2007 in the subject U.S. patent application, the drawings were objected to as allegedly failing to include the reference numeral 03 mentioned in the description. That objection is respectfully traversed. In Fig. 1 of the drawings, as filed, there are depicted four printing units 03. These are the double H-shaped units generally, at the middle portion of the drawing and flanking the fold forming hopper 09. Each of these four printing units 03 is so numbered in its center. It is thus believed that the drawings, as filed, do contain the reference numeral 03.

In the Amendment filed February 14, 2007, there were submitted two sheets of drawings which were captioned, at their top margins, as "Annotated Drawings." They proposed several minor changes to the drawings, as discussed at page 14 of the Amendment of February 14, 2007.

The Final Office Action of June 5, 2007 indicated that the drawings filed on February 14, 2007 were accepted. Since the changes proposed on those two annotated sheets were clearly informal, there are now submitted two Replacement Sheets that formalize the changes set forth on the two annotated sheets. The submission of these two Replacement Sheets does not present any new matter. Their entry is respectfully requested.

The Final Office Action rejected claims 39-58 and 66-76 under 35 USC 112, second paragraph as being indefinite. No prior art rejections were made with respect to these claims because of their 35 USC 112, second paragraph issues. Claims 77-79 were allowed.

Claims 39-58 and 66-76 have been cancelled from this application. Applicants will file a continuation application directed to these cancelled claims, which will be rewritten in appropriate format, upon receipt of a Notice of Allowance in the subject application. Such action is taken to advance the prosecution of the subject application while preserving applicants' rights in their

invention.

Allowed claims 77-79 have been carried forward. Since they are the only claims now pending in the subject application, it is believed that the application is now in condition for allowance. Such action, and the forwarding of the application to issue is believed to be appropriate.

## SUMMARY

Two Replacement Sheets of drawings, to formalize the proposed changes set forth on the annotated sheets filed with the Amendment of February 14, 2007, are submitted. Their submission does not constitute any new matter.

All of the previously rejected and previously withdrawn claims in the application have been cancelled. Applicants reserve the right to file one or more divisional and continuation applications directed to these cancelled claims.

Allowed claims 77-79 remain in the application. Since only allowed claims are now pending in this application, and since the drawing objection raised in the Final Office Action has been traversed, it is believed that the application is now in condition for allowance. Such action and the forwarding of the application to issue is respectfully requested.

Respectfully submitted,

Harald Karl GRETSCH et al.
